

JESÚS ARNOLDO RAMON OYERVIDES

Observability Engineer | Software
Developer | Automation Engineer

Mobile

+52 844 183 44 51

Location

Saltillo | Coahuila

E-mail

jesus.ramon2192@gmail.com

OBJECTIVE

I would like to work for a recognized organization on projects related to **Automation**. I offer my skills, experience, talents, and knowledge to contribute with results that make a difference.

INTERESTS

Software
Development

WEB
Pages

Observability
Software

COMPETENCIES

Web Analysis and Research

Time Management

Resilience

Initiative

+ INFORMATION

SOLUTIONS AND EXPERTISE:

Agent Observability Installation and Monitoring | Developing applications and web services with HTML, CSS and JavaScript | *Fundamentals of Programming, Computer Science, APIs and Internet Services* | Programming in JavaScript, Python and Object-Oriented Development | *Styling Applications with Tailwind and Modern CSS* | Using Commands in Linux and Windows Terminal for Server Administration | *Analyzing Data with New Relic* | Automating workflows with APIs and scripting | *Using REST APIs with JavaScript: fundamentals, performance and integration* | Backend logic with Node.js and server-side scripting | *A sync with JavaScript* | Node.js and asynchronous programming | *Monitoring Databases PostgreSQL and MySQL with New Relic* | Debugging with Chrome Dev Tools | *Modern CSS layouts with Grid and Flexbox* | Data structures and problem solving with JavaScript | *Containerization and virtualization fundamentals* | Docker & Kubernetes Fundamentals | *DOM manipulation and browser APIs* | Using Prompt Engineering with AI models and ChatGPT | *Workflows with N8N* | Data visualization for monitoring and business insights | *Responsive design with mobile-first layouts* | IT security fundamentals for technical teams | *Git and GitHub for version control and collaboration* | Building web applications and automation services | *Integrating backend logic and APIs interfaces*.

PROFESSIONAL EXPERIENCE

Observability Engineer | Sopris Technologies | *May 2024 – Present*.

Design and implement monitoring solutions for cloud and on-premise environments using New Relic's observability platform and Catchpoint for network monitoring. . *Lead guided installations of Infrastructure, APM, and Browser agents across diverse client systems, ensuring full telemetry coverage, performance visibility, and network observability.*

"Choose a job you like, and you will never have to work a day in your life." **Confucius**.

Train end-users and IT teams in the effective use of New Relic, including creating custom dashboards, alert conditions, and NRQL queries to generate actionable insights. *Conduct troubleshooting sessions to identify performance bottlenecks, application errors, network issues, and resource misconfigurations.*

Develop automation scripts to accelerate agent deployment and meet specific observability requirements. *Build and maintain laboratory environments that simulate real-world scenarios to test, validate, and document best practices for agent installation, monitoring integrations, and configuration..*

Plant Engineering Supervisor | Stellantis | *August 2020 – May 2024.*

Coordinate and perform outdoor maintenance work. *Ensure a clean and safe environment for employees and visitors.* Supervise and maintain outdoor lighting systems. *Maximize safety and energy efficiency.* Organize and perform tasks required to keep parking lots in optimal condition. *Directing regular maintenance of critical equipment.*

Management of requisitions for the purchase of services and spare parts. *Ensuring the availability of the resources required for maintenance.* Collecting and analyzing data to produce detailed reports on water, gas, and electricity consumption in each building. *Developing Excel files to optimize the monitoring and control of the various activities.* Leading energy-saving initiatives, including the installation of variable-frequency drives for centrifugal pumps, the replacement of lighting with more efficient options, and constant monitoring of baseline consumption. *Taking charge of the management and timely payment of invoices related to services and supplies necessary for the proper functioning of the infrastructure.* Establishing a system of guards and rotating shifts to ensure constant coverage. *Efficient*

ACADEMIC BACKGROUND

-  **English Program** | Harmon Hall | *May 2024 – Current.*
-  **Diploma & Certifications** | Platzi | *May 2021 – May 2024.*
-  **Mechatronics Engineering** | Instituto Tecnológico de Saltillo | *Professional License: 10069891.*

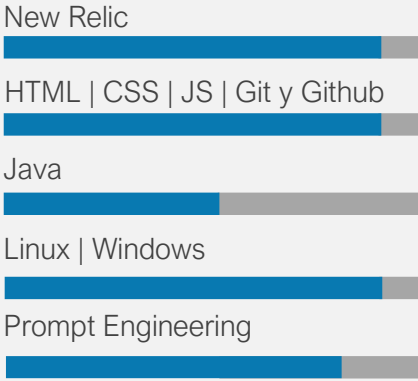

SKILLS

- Technical troubleshooting and research using reliable documentation.
- Building New Relic dashboards and reports with NRQL.
- Automating New Relic agent using scripting.

BRIEFCASE

KNOWLEDGE

VALUES

- Integrity
- Execution
- Commitment

KEY WORDS

Observability Engineer | Software Developer | Linux Engineer | Scripting and Automation | API Integration | Artificial Intelligence Applications | Mobile Applications | Linux Servers | Cloud and DevOps Fundamentals | Technology | Digital Applications | *Perform remote work.*
